Political Monitoring

Biodiversity politics in Belgian parliaments Questions and Discussions

26 January 2023
www.biodiv.be

- The after COP15 -

What are the outcomes of COP15?

After two weeks of negotiation and years of preparatory work, 196 nations adopted a package, **the Kunming – Montreal Global Biodiversity Framework**. The package includes a list of goals and targets that address **direct drivers of biodiversity loss and decisions on the review of implementation, resource mobilization, digital sequence information, and capacity building and technology transfer**. This historic deal aims to be a roadmap to protect and restore nature for current and future generations.

Some key components of the global biodiversity framework:

- **Restore** 30% of degraded ecosystems globally on land and sea by 2030.
- **Conserve and manage** 30% of areas (terrestrial, inland water, and coastal and marine) by 2030.
- Stop the **extinction of known species**, and by 2050 reduce tenfold the extinction risk and rate of all species.
- Reduce risk from **pesticides** by at least 50% by 2030.
- Reduce **pollution risks** and negative impacts of pollution from all sources by 2030 to levels that are not harmful to biodiversity and ecosystem functions.
- Reduce **global footprint of consumption** by 2030, including through significantly reducing overconsumption and waste generation and halving food waste
- **Sustainably manage** areas under agriculture, aquaculture, fisheries, and forestry and substantially increase agroecology and other biodiversity-friendly practices.
- Tackle **climate change** through nature-based solutions.
- Reduce the rate of introduction and establishment of **invasive alien species** by at least 50% by 2030.
- Secure the safe, legal and sustainable use and **trade of wild species** by 2030

The political monitoring of the Belgian National Focal Point to the Convention on Biological Diversity carries out research on biodiversity and ecosystem-related topics at the level of the different Belgian legislative institutions: the Chamber, the Senate, the Walloon parliament, the parliament of the Walloon-Brussels federation, the Flemish parliament, the Brussels parliament and the European parliament. The monitoring aims to give a non-exhaustive overview of the different ongoing policy developments related to biodiversity and ecosystem services in these legislative institutions.
