EU Nature restoration law: MEPs strike deal to restore 20% of EU's land and sea

The political monitoring of the Belgian National Focal Point to the Convention on Biological Diversity carries out research on biodiversity and ecosystem-related topics at the level of the different Belgian legislative institutions: the Chamber, the Senate, the Walloon parliament, the parliament of the Walloon-Brussels federation, the Flemish parliament, the Brussels parliament and the European parliament. The monitoring aims to give a non-exhaustive overview of the different ongoing policy developments related to biodiversity and ecosystem services in these legislative institutions.
